

MEMORANDUM

From:	Dr Adelheid Onyango Director HSS a.i	To:	WRs listed below	Date:	23 July 2026
Our ref:		Attention:			
Your ref:		Through:	PAO		
Originator:	MDI	Subject:	REQUEST TO FACILITATE WORKSHOP FOR LOCAL PRODUCTION COUNTRY PROFILES		

1. Background:

The development of local production country profiles is a critical exercise for strengthening health systems and advancing self-sufficiency in the African region. These profiles serve several key purposes:

- Establishing a comprehensive Database of each country's local production ecosystem including policies, legal frameworks, production capabilities, health financing, technology transfer, workforce, regulatory maturity;
- Serve as a national Reference Document to guide decision-making on ecosystem strengthening;
- Support investor and donor engagement by clearly presenting the local production landscape;
- Enable ecosystem assessment, identification of gaps and design of tailored roadmaps for country-level support;
- Foster stakeholder collaboration across ministries of health, trade, commerce, industry, procurement agencies, and national regulatory authorities.

2. Rationale:

The rationale for convening workshops lies in ensuring that the Local Production Country Profile questionnaires are populated comprehensively and inclusively. By engaging all relevant stakeholders, the process guarantees that diverse perspectives are captured, resulting in validated national reference documents that can inform policy, attract investment, and guide future support.

.../..

Distribution:

WHO Representatives: Cameroon, DRC, Ethiopia, Kenya, South Sudan, Tanzania and Uganda.

3. Objectives:

The workshops aim at:

- Facilitate collective completion of the Local Production Country Profile questionnaires;
- Ensure representation and input from key national stakeholders, including the National Regulatory Authority, Ministry of Health, Ministry of Commerce, Industry and Trade, and the National Procurement Agency;
- Produce country-specific profiles that will be submitted to ministries for review and consent prior to publication;
- Deliver validated documents that strengthen national health systems and promote self-sufficiency.

4. Request:

This memorandum seeks the support of the WHO Representatives in facilitating the organization of the local production workshop in their respective countries.

5. Financial Implications:

WHO-AFRO will provide funding support for the organization of these workshops. Specifically, AFRO will reimburse the WCO for the workshop costs through an ADR, once the costs are reflected on GSM, due to restrictions with the award used.

Best regards,

Approval for eDocument - AF-2026-DOCS-eMemo-321408

Cleared	ISMAIL, Mohamed	23-Jul-2026 1:50 PM	24-Jul-2026 2:17 PM	The proposed workshops will offer support to countries in completing their profiles, which is a strategic document describing the local manufacturing environment at a glance. Funding will be sent once the expenditures are reflected on GSM, using a temporary PTAE0 at WCO. The award AFRO will use is the EC INTPA award.
